

Series Description

The Flex Series is one of the most flexible, sustainable, and affordable wall systems available on the market. It offers numerous options that are not commonly found within a demountable wall system. The Flex wall system fits the needs of your workspace- both today and tomorrow. Wall finishes are easily switched from solid to glass to whiteboard to tackable fabric panel, with minimal interruption. Break out of the molded cubicle! See what the Flex Series can do for your workspace.

Series Description

The View Series is your choice if you're after a clean, simplistic, yet contemporary space. View truly sheds light on the solution for a sustainable and sophisticated architectural wall that is distinctive and adaptable. This simple but elegant wall solution emphasizes minimal seams within the full height centered glass. Sliding and swing door options along with the unlimited glass options promote creativity in designing your workspace. Flexible enough to accommodate spaces with uneven floors, our View glass front wall system is quickly demountable to meet your changing needs.
